

# Mubea

light.efficient.global.

We are international  
supplier to automotive  
industry

In Prostějov, we employ  
more than 1000 people  
and we produce hi - tech  
chassis parts based on  
our own technology and  
innovations.

## Bachelor/diploma thesis

### Process simulation of stamping process for system components

**Background:** To improve the robustness of the stamping process a process simulation for a follow-on and transfer die should be performed.

#### Objective targets for the thesis:

- ☐ Analysis of the stamping process for a specific system component product
- ☐ Process simulation of the stamping process
- ☐ Identification of most important/critical process influences
- ☐ Conclusion and recommendations

**Result of the thesis:** Measures for the robustness improvement of the stamping process of system components
