

International Conference Advances in Environmental Engineering

November 28 - 30, 2017
Ostrava, Czech Republic

FACULTY OF CIVIL
ENGINEERING
TECHNICAL
UNIVERSITY
OF KOŠICE
1977 - 2017

1st International Conference Advances in Environmental Engineering under Auspices of prof. Ing. Vincent Kvočák, PhD., the Dean of the Faculty of Civil Engineering and assoc. prof. Ing. Jan Valíček, Ph.D. the Dean of the Faculty of Mining and Geology.

Conference info

International Scientific Conference on "Advances in Environmental Engineering"(AEE) is organised by Faculty of Mining and Geology of the VŠB-Technical University of Ostrava, Czech Republic and Faculty of Civil Engineering of the Technical University of Košice, Slovakia in November 28-30, 2017 to be held in Ostrava, Czech Republic. The conference will be held on the occasion of 40th anniversary of the founding of the Faculty of Civil Engineering and continues on previous environmentally focused conferences organised by Technical University and Slovak Chemical Society. The idea of founding a new series of environmentally oriented conferences was based on the need of scientists and expert from praxis in V4 region to have a common platform for exchange of knowledge and expertise on various environmental topics. The goal of AEE 2017 is, in addition, to provide a global platform for all researchers and engineers coming from academia and industry to present their research results and activities in the field of fundamental and interdisciplinary research of environmental science and technology. The conference offers an international platform for the dissemination of original research results, new ideas and practical development and discovers advances in the field of environmental engineering and related interdisciplinary topics.

All the registered and presented papers will be published in the conference proceedings indexed by SCOPUS (IOP Conference Series: Earth and Environmental Science).

Topics and Dates

- Water and wastewater management
- Water and sediment pollution control and remediation
- Soil degradation, conservation and remediation
- Waste management
- Landscape management
- Sustainable building materials and technologies
- Innovative solutions to key building materials
- Life cycle analysis of materials and constructions
- Environmental indoor air quality

Submission Abstract:

July 30, 2017

Submission Full paper:

September 20, 2017

Fee payment:

September 30, 2017
