- Interest in Innovations and current technological trends
- Team player

With over **100 years tradition in precise engineering**, Control Seal B.V. is one of the world's leading **valve manufacturers** for Petroleum industry. We are innovative company creating tailored production for the most prestigious Oil and Gas corporations around the world. We are currently searching for students to join our international team in company headquarters in the **Netherlands** (Appingedam).

Currently we are looking for motivated students interested in the areas of **Production engineering, Material & Design and RND Engineering**. As an Intern, you'll work alongside our international Engineering team on existing as well as innovation projects and gain practical knowledge. We will welcome your own initiative. You can lead your own project and/or conduct a research for your thesis. You will become an expert in the area of your interest and if our mutual cooperation works well, we will be happy to have you work with us long term.

WE OFFER:

- Paid internship (minimum 2 months, possible to organize during summer holidays)
- Accommodation provided by the company right in Appingedam (known as the Venice of the North), with plenty of biking routes and student city Groningen nearby
- Work abroad experience and insight into Precise Engineering
- Opportunity to work on your thesis or project
- Possibility of future employment
- Great multinational work environment and company sport activities (football, gym)
