Call for Papers

28th SFU / 7th ICAFT, Nov. 2 – 3, 2022, Chemnitz

Rethinking Forming Technology – Transforming Added Value

– Digitalization, Resilience, Changing Process Chains –

About the Conference

The double conference consisting of the **28th Saxon Conference on Forming Technology SFU** and the **7th International Conference on Accuracy in Forming Technology ICAFT** deals with the latest developments and solutions of current challenges and trends in forming technology. This constellation of the event offers an ideal platform for exchanging ideas with top-level speakers from science and industry. Another highlight of the event includes the traditional demonstrations of »Forming Live«.

Submission of Abstracts

Abstracts for conference papers are to be submitted by **April 17, 2022**. They need to address at least one of the following topics:

- Solutions for future mobility concepts
 - New structures and components
 - Functional integration in lightweight construction
- Geometry flexibility and productivity
- Innovative materials and semi-finished products
- Alternative process chains for components and tool manufacturing
 - Resilient
 - Flexible
 - Efficient
- Efficient production systems in volatile production environments
 - Forming machine
 - Forming tool
 - Process monitoring and process control (sensors/actuators)

For further information about the rules of abstract submission and the general conference, please refer to the conference website:
