Conference Objectives:

The International Scientific Conference goals are to serve as, a forum for an interchange of experience; a presentation of research findings and practical application; a place of meeting for university scientists and industry workers who engage in research and technical activities.

The papers from previous EPE conferences were published in IEEE Xplore digital library and indexed in Scopus and the Web of Science.

Conference Topics:

The International Scientific Conference focuses on key problems of today's power engineering that stem from both technical and economic needs of the power industry. It also deals with research activities of development institutions and universities.

Main Topics:

Operation and Control of Transmission and Distribution Systems – Power Stations – Nuclear Energy Utilization – Renewable Energy – Energy Storage and Flexibility – Energy Communities – Heating Systems and Intelligent Buildings – Hydrogen Technology – Smart Grids / Cities / Technologies – Electric Lighting – Power Quality, Reliability, Maintenance and Diagnostics – High Voltage Technology – Electrical Machines and Devices – Electrical Drives and Power Electronics – Transport Electrification – Power System Protection – Information Systems
