

Director  
of **IT4Innovations National Supercomputing Center**  
VSB - Technical University of Ostrava  
announces a selection procedure for a post of  
**Innovation Technology Developer - Data Management Backend**  
for Advanced Data Analysis and Simulations Lab

The position is suitable for both women and men.

**IT4Innovations National Supercomputing Center** is a leading research, development, and innovation centre active in the fields of High-Performance Computing (HPC), Data Analytics (HPDA), Artificial Intelligence (AI), and Quantum Computing (QC) and their applications. We have strong international links and employ more than 180 scientific, technical, and administrative staff. At present, IT4Innovations is running two supercomputers: Karolina (15.7 PFlop/s, installed in the summer of 2021), Barbora (849 TFlop/s, installed in the autumn of 2019), and is a member of the consortium operating LUMI, one of Europe's most powerful supercomputers. IT4Innovations also operates the first Czech quantum computer named VLQ. For more details, see [www.it4i.eu](http://www.it4i.eu).

**Activity description:**

We are extending our team with a new technical position to drive development of complex distributed services focused on easy access to compute workflows and distributed data management across HPC clusters, Quantum and Cloud environments. This position is focused on backend developers working with modern services REST APIs developed in Python and/or C#, databases and object storages. Experience with design and operation of scalable and distributed services is an advantage.

The responsibilities of the candidates for this role are:

- development of software features of an on-line service focused on data management and transfers,
- participation on feature design decisions and roadmap definition,
- communication with researchers and development team,
- analysis of new requirements and feature definition.

**Full time equivalent:**

full time employment,

**Type of job contract:**

fixed-term employment

**Expected start of employment:**

1. 9. 2025 or as agreed

**We require:**

- master's degree in software engineering or computer science,
- 2 years experience with backend development,
- experience with software development management,
- proven experience with backend development in Python or C#,
- experience with relational or document databases, object storages is an advantage,
- basic knowledge of networks and common data transfer protocols,
- will to work in an international environment which requires good communication skills in the English language both spoken and written,

- good communication skills and independent problem solving,
- ability to learn new technologies and to work in a dynamic environment.

**Candidate advantage:**

- PhD degree and/or Experience with work on applied research projects.

**We offer:**

- work in a friendly team fostering open and efficient communication,
- salary evaluation according project conditions and candidate's experience,
- modern tech stack (Python, FastAPI, OpenID, object storages),
- opportunity to work with cutting edge computing technologies,
- possibility of further education,
- 6 weeks of holidays,
- flexible working hours,
- university kindergarten,
- contribution option to pension plan,
- company catering in the canteen,
- MultiSport card,
- other employee benefits according to the employer's offer.

Your personal data will be processed to the extent necessary for the implementation of the selection procedure in accordance with EU Regulation 2016/679.
