

# BLENDDED INTENSIVE PROGRAMME (BIP)

## WILDFIRES PREVENTION AND MANAGEMENT

The Wildfire Prevention and Management course aims to **train professionals to be able of dealing with the growing intensity and severity of wildfires around the world**. This course goes beyond conventional boundaries, exploring the challenges that today's wildfires present to firefighters and emergency managers, focusing and working on case studies of extreme fire behaviour and the use of decision support tools.

**LOCAL:**

Lusófona University – Porto Campus  
Portugal

**DATE:**

04 to 08 May 2026

**ECTS:**

3

**The intervention areas of this course cover the topics of extreme fire behaviour, prescribed burning, the use of drones as a decision support tool, as well as the discussion of case studies.**

With the aim of developing joint work between universities, **this BIP is based on active problem-based learning and role-playing techniques**. There will also be an immersive experience in wildfires and civil protection with the presence of mediation teams. To disseminate collectively constructed knowledge, throughout the course students and teachers on Erasmus+ mobility are challenged by the tasks proposed in workshops, to prepare chapters/papers to integrate a conference or journal in the field of Wildfire Prevention and Management.
